

calibrate::calibrateAll

calibrate::findMinMaxPressure

calibrate::findMinPressure

```
graph LR; A[calibrate::calibrateAll] --> C[calibrate::findMinPressure]; B[calibrate::findMinMaxPressure] --> C;
```

The diagram illustrates a functional dependency or call relationship. Two source functions, 'calibrate::calibrateAll' and 'calibrate::findMinMaxPressure', are shown on the left. Arrows from both of these functions point to a single target function, 'calibrate::findMinPressure', which is highlighted with a gray background. This suggests that 'calibrate::findMinPressure' is a common sub-function or a core component used by both 'calibrateAll' and 'findMinMaxPressure'.
