

MasterModule::resetAllParameters

setup

BaseModule::version

```
graph LR; A[MasterModule::resetAllParameters] --> C[BaseModule::version]; B[setup] --> C;
```

The diagram illustrates the dependencies of the `BaseModule::version` variable. It is represented by a gray rectangular box on the right. Two blue arrows point towards this box from the left. The top arrow originates from a white rectangular box containing the text `MasterModule::resetAllParameters`. The bottom arrow originates from a smaller white rectangular box containing the text `setup`.
