

MasterModule::resetAllParameters

MasterModule::saveAllParameters

EEPROMSaveString

```
graph LR; A[MasterModule::resetAllParameters] --> C[EEPROMSaveString]; B[MasterModule::saveAllParameters] --> C;
```

The diagram illustrates a data flow where two functions, `MasterModule::resetAllParameters` and `MasterModule::saveAllParameters`, both interact with a common variable named `EEPROMSaveString`. The functions are represented by white boxes on the left, and the variable is represented by a gray box on the right. Two blue arrows point from each function box to the variable box, indicating that both functions access or modify the same memory location.
