

bowIO::bowOverPower

```
graph LR; A[bowIO::bowOverPower] --> B[bowIO::getBowCurrent]
```

A diagram showing a call from `bowOverPower` to `getBowCurrent`. The `bowOverPower` node is a gray rectangle, and the `getBowCurrent` node is a white rectangle with a black border. A blue arrow points from the right side of the `bowOverPower` node to the left side of the `getBowCurrent` node.

bowIO::getBowCurrent
