BowActuators::removeBowActuator

ModuleGroup::removeModule

```
graph LR; A[CREATE_MODULE_COMMAND_FUNCTION] --> E[ModuleGroup::removeModule]; B[CREATE_MODULE_COMMAND_FUNCTION] --> E; C[CREATE_MODULE_COMMAND_FUNCTION] --> E; D[CREATE_MODULE_COMMAND_FUNCTION] --> E; F[BowActuators::removeBowActuator] --> E;
```

The diagram illustrates a call graph where five different functions or methods are invoked by a single target function. On the left, there are five rectangular boxes, each containing the text 'CREATE_MODULE_COMMAND_FUNCTION'. The bottom-most box contains 'BowActuators::removeBowActuator'. On the right, there is a single, wider rectangular box with a grey background containing the text 'ModuleGroup::removeModule'. Five blue arrows originate from the right side of each of the five boxes on the left and point towards the left side of the 'ModuleGroup::removeModule' box, indicating that all these functions call the target function.
